

## Creative Language Integration Coordination Office: Role Description

- 1) CLIC is a student community established within the School of Foreign Languages in 2021.
- 2) Founded entirely to reinforce language use, the community runs activities that enable our preparatory students-who follow an intensive programme-to apply what they have learned outside the classroom.
- 3) CLIC activities are carried out by students under the guidance of academic advisors.
- 4) Within the School of Foreign Languages, CLIC is open to all preparatory students; it is not limited to any particular group or level.
- 5) Taking into account that the target group is expected to be well developed in so-called twenty-first-century digital skills, most activities are implemented through language-and-technology integration.
- 6) Through its activities, the CLIC community aims to make the presence of the target language visible across the campus and to engage our students in the learning process with a do-enjoy-learn philosophy.
